Network backed up? Are you sure?

7Sigma Systems INC **/SECURE**

Proper backups can save your business. Get a backup solution in place today!

Secure Carrier Network

Your carrier network is your product. Routers, switches, and access equipment need the most secure/stable releases and nightly backups. Make sure all of your devices are backed up daily with the most stable and reliable codebase with our Secure Network solution.

Key features:

- Works on all systems
- Saves time and headaches with on demand visibility and automated task execution
- Inexpensive with volume purchases
- Shows easy to correct errors if updates fail
- Explains why a backup didn't occur, what is out of spec, and allows for quick backups and scheduling

Problem Solved

Automates carrier network management and inventories into an easy to manage across all devices and delivers "whole network" backup integrity in one comprehensive package
